

The background features abstract, overlapping geometric shapes in various shades of blue, ranging from light sky blue to deep navy blue. These shapes are primarily located on the right side of the frame, creating a modern, dynamic feel. The rest of the background is plain white.

WIN

ODM product

WIN1001 : Arc Protective Rain Wear

- PVC coated aramid material , fire retardant , offering protection against electric arc exposure , water and rain .

Flourescent colors to enhance wearer visibility

- Designed according to NFPA 70E for electrical safety in the work places .

Tight garment closures to prevent water penetration with air vent to dissipate body heat and sultriness.

- Suitable for location and jobs which require protection against arc heat , flame and water such as electric power industry , oil fields , mines and military operation .

Summary of Tested Performance :

Flame Resistance	GB8965,ASTMD613,EN533	pass
ARC Protection	ATPV ASM F1891/F1959	11.9 cal/m ²
Bursting Heat	EBTAS ASTM F1891/F1959 HAF	35cal/m ²
Heat Attenuation factor	HAF ASTM F1891/F1959	80.3%
High Visibility	ANSI107	pass
High Visibility	EN471	pass
Surface Pilling resistance	Laundered 10 cycles at 60°C	not pilling Detcted

WIN1002:Flame& Antistatic Clothing

Features:

- Flame Resistance: Fiber inherently flame resistant does not melt or drip .
Flame resistance does not go away with laundering.
- Static Resistance: Blended with conductive fiber to offer protection against static hazards . Antistatic nature does not go away with laundering .
- Comfort: Blend with natural cotton , soft and smooth , with very good moisture permeation and sweat absorption , comfortable to wear.
- Durability: Quality cotton is used to increase fabric strength , making it more durable.

Main uses:

- Oil & gas fields , chemical industry , petrochemical industry.
- Power generation , transmission and distribution , electric equipment installation and maintenance workers.
- Electricians and maintenance workers.
- Army & Police uniforms.

Safety standards:

- GB8965
- EN11612(EN531) EN1149-5
- ASTM D6413
- ASTM F1959
- IEC61482-1
- EN471 , ANSI107
- GB 8965

Garment Available:

- coverall , flight suit.
- Work jacket , shirt , trousers , lab coat.
- Insulated winter coverall , parka and bib overall.

WIN1003:Aramid Protective Clothing

Features:

- Flame Resistance : Inherent property , does not wash or wear away , superior resistance to industrial flash fire .
- Heat Resistance : Higher than natural fibers and most synthetic fibers , fabric strength is very stable even exposed up to 300c heat.
- Static Resistance : Conducted fiber to achieve lasting anti-static nature.
- Durability : High physical strength , durable a long service life. Garment double or tripled stitched with aramid thread has extremely strong seams.
- Functionality : Meta aramid and para aramid have different nature.

Different combination of the fibers offer different functional options to play various protective roles.

Main Uses :

- Industrial protective work wear for oil/gas fields. Oil refineries. Military and police uniforms. Electric power industry.
- Structural firefighting , wildland and forest fire fighting.
- Car or motorbike racing , air crew uniforms , space travel , airfield ground crew.
- Chemical plants , laboratories.

Safety Standard:

- EN11612
- NPFA2112
- NFPA1971
- NFPA1977
- GB8965

WIN1004 : Molten Metal Protective Clothing

shirt:

- 50% Lenzing , 40% Wool , 10% Nylon.
- Permanently flame resistant , does not wash or wear away , durable.
- Fabric:7.5oz cold/chambray blue.
- Two chest pockets , button front , Reflective tape can be added to sleeves and back.
- Best to wear a cotton t shirt underneath to enhance comfort.
- Widely used in steel and aluminum making and smelting industry.

Trouser

- 50% Lenzing , 40% wool , 10% Nylon.
- Permanently flame resistant , does not wash or wear away , durable.
- Fabric: 10.0oz or 12.0oz , navy blue.
- Lined with flame resistant cotton to add comfort and safety.
- Strong seams built for durability.
- Widely used in steel and aluminum metal making and smelting industry

Jacket/Overcoat

- 50% Lenzing , 40% Wool , 10% Nylon.
- Permanently flame resistant , does not wash or wear away , durable.
- Fabric option:10.0oz/12.0oz , navy blue
- Upright collar with neck strap , button front , big pockets.
- Reflective tape can be added to sleeves and back.
- Flame resistant lining can be added if required to add comfort and protection.
- Widely used in steel and aluminum making and smelting.

WIN1005 : Multifunctional Underwear

Multi-Functional Polo Shirt , T-shirt ,
Underwear

- Antistatic to EN1149-5 , preventing electrostatic hazards and skin discomfort , especially in low humidity climate.
- Anti-bacteria finish to ASTM E2149 to control bacteria propagation , keep the wearer in good hygienic condition.
- The special weave pattern enhances moisture permeation , achieving 0.5cc water drop dispersion in 5 seconds.
- UV Protection : Can achieve UPF40 , meeting the minimum requirements of UPF20 of AS/NZS4399 after 20 washes.

WIN1006: High Visibility Rain Wear, Flame & Static Resistant

FR Antistatic Rain Wear

- Not only high visibility water resistant and breathable, but also flame resistant and antistatic.
- Fluoro-color PU laminated , conductive thread evenly woven in to achieve permanent antistatic property. Water resistance to JIS 10000 Pa and moisture permeation to 8000 Pa.
- Widely used in oil , gas , electric power industry for outdoor work , police and road work. Optional detachable fleece liner for cold weather.

Meeting standards:

- EN343-2003 ·EN3400-2003
- EN1149-3:2004 ·EN533-1:1997
- EN471 ·ISO 4674:1997
- BS EN ISO 1421:1998

3-IN-1 Cross Weather Nylon Jacket

- Extra light weight nylon shell with stretch in two ways.
- Antistatic and easy to clear.
- High level of water resistance and moisture permeation.
- Functional membrane protects against water and wind and keeps the garment breathable.
- FR fleece jacket liner inside to make warm.
- Both outer jacket and inner liner can be worn separately under different weather conditions.

4-IN-1 FRA Weather Jacket

- Consist of four separable components-outer jacket , liner , hood and sleeves.
- The components can be assembled to wearer's discretion to fit weather conditions ranging from 30.c to below zero.
- Durable PU laminated polyester oxford , flame resistant and antistatic to EN533 , EN1149-3 , Water resistant and breathable to EN343 Class II.
- FR fleece jacket liner inside to keep warm.
- Hi-visi yellow and orange colours also available.

WIN1007:Cotton & Cotton-Polyamide Protective Work Wear

Product Features:

•Treated to be flame resistant. FR performance even after 50 washes still meets GB , US and European standards.

•Conductive yarns woven into the fabric. The antistatic performance will not wash or wear away.

•100% natural cotton , excellent moisture gaining , comfortable to wear , Some polyamide fiber can be added in to enhance its abrasion resistance and therefore durability.

•Widly used Oil/gas , chemical , petrochemical , electric power , electrician , metallurgical industries.

Fabric Options & Standards Met :

Fabric Weight (g/m ²)	Protective Function Option	Safety Standard	Colours Available
210g Cotton Twill	 	EN11612/EN1149	Yellow
240g Cotton/cotton -Polyamide Twill	 	EN11612/EN1149	Orange Royal
260g Cotton Twill Sateen	   	EN11612/EN1149 NFPA2112 ASTM F 1959/GB8965 GB12014/GB12769	Navy Tan Red Grey
360g Cotton Cotton-polyamide Twill/Sateen	   	EN11612/EN1149 NFPA2112 ASTM F 1959/GB8965 GB12014/GB12769	Customer Colours
360g Cotton Twill/Sateen	   	EN11612/EN1149 NFPA2112 ASTM F 1959/GB8965 GB12014/GB12769	

WIN1008:Flame & Arc Protective Work Wear

Widely Used in Power Industry , Oil/Gas Fields , Oil Refineries and more...

- Flame resistance meets ASTM D6414 , EN11612 , GB 8965.
- Meeting US Workplace Electric Safety standard NFPA 70E HRC2
- Meeting US Industrial Flash Fire protection standard NFPA2112.
- ATPV rated to suit applications for arc protection.
- Blending of inherently FR and patented cellulose fiber.
- High moisture wicking performance for unsurpassed comfort.
- Stand many washes and still keep like-new look.
- Highly heat and abrasion resistant to be very durable.
- Affordable acquisition cost to provide great value.

Fabric	Weight	Weave	Application
Tecasafe™ plus 700	238g/m ² (7.0 oz)	Twill	Coverall, Jacket Trouser
Tecasafe™ plus 580	195g/m ² (5.8 oz)	Twill	Shirt, coverall (Light Weight)

Tecasafe™ plus 85-A	288g/m ² (8.5 oz)	Twill	Coverall, Jacket, Trouser

WIN1009:High Performance Insulation

Wincomp's new micro-fiber insulation specially engineered to have much more interfiber chambers than ordinary fleece to trap more air for better insulation. Compared with many other types of synthetic insulating fleece, it is much Thinner, Lighter, Softer, Warmer, Washable. The new insulation is superior lining material for winter garments. This new insulator provides an efficient and cost-effective solution to protect against extremely low temperature.

Weight available: 50g/m², 100g/m², 120g/m², 150g/m², 200g/m², 250g/m²

WIN1010:ARC Flash Protection

Features:

·ARC flash might occur during high energy power line switching , short circuiting and repairing. Operatives might get struck and burned from high temperature resulting from Arc flash.

·The intense energy and very short duration arc flash represents a unique safety hazard. According to OSHA requirement , PPE are classified to 4 categories in relation to ATPV rating. Different category of protective garments needs different material and construction.

·Main use: Switch pulling , electric generation and transmission , high voltage power line repair and maintenance.

Category 1 PPE : $ATPV \geq 4 \text{Cal/cm}^2$

Category 2 PPE : $ATPV \geq 8 \text{Cal/cm}^2$

Category 3 PPE : $ATPV \geq 25 \text{Cal/cm}^2$

Category 4 PPE : $ATPV \geq 40 \text{Cal/cm}^2$

Chinese Standard Arc Flash Suit
·Meeting Chinese standard DL/T320-2010.

·Garment features: Inherently flame resistant , comfortable to wear , and of great value.

·Main uses: Protective wear for people working in electric generation , transmission , transforming , distribution and repairing.

WIN1011: Radiation Shielding Garment

Features:

Made of well-know US nanotechnology engineered material , tested for nuclear decay by the US

Department of Energy and several university radiation labs , proven to provide effective shielding against various forms of ionizing radiation rays. The material also provides protection against chemical vapors dissipates body heat , non-toxic to human body , lighter than lead garment , soft in texture and comfortable.

Where are they used?

EMERGENCY RESPONSE : Help emergency teams to respond to road accidents involving radioactive materials terrorist attacks involving radioactive devices , or nuclear weapons.

INDUSTRY : Most product for industrial & medical uses do not protect against ionizing radiation. Radiation Shielding Garment effectively reduce the overall occupational does of some radiations.

Most military garments do not protect against penetrating ionizing radiation. Radiation Shielding Garment can be worn alone , or in conjunction with other clothing to protect soldiers in specific radiological combat context.

CIVILIANS : Provide civilians with an effective form of protection to evacuate from a radiological emergency.

Full Body Suit :

·Full body protection , come with respiratory mask , glove , booties , anti-radiation sealtape and carry bag. Total weight 3.5kgs.

Vest :

·Protection of the upper torso
·Weight 1.5kgs.

高性能辐射屏蔽背心
